Data Augmentation
Event-related keywords
Data collection
Tweets
Task-specific corpora generation
References & Candidates
Embedding tweet pairs
Training/test data
NLM fine-tuning
Fine-tuned NLM
Pairs of embeddings of references and candidates
Paraphrase identification corpus
Semantic relatedness fine-tuning
Optimum thresholds for semantic similarity
Compute semantic similarity
Similarity scores for all pairs
Apply thresholds
Augmented data (a sequence of source tweets & their contexts)
Potential Rumour Identification
Event-related keywords
Data collection
Event-related Twitter data
Time series generation
Time series
Feature extraction
Temporal signals
Burst detection
Key bursts & tweets
Burst summarisation
Potential rumours
Rumour detection
Rumours
Evaluation/ Model selection
Model
Generate train & test sets
Train set
Test set
Feature extraction
Content representations
Social-temporal features
Modelling
Modelling
Concatenate
Classification
A sequence of labels (rumour or non-rumour)
Evaluation
Model
Rumour detection
Rumours
Context-Sensitive Rumour Detection
